

# NOTICE

**Temporary Water Shutdown  
August 22 Through 23, 2022  
7:00 PM to 5:00 AM**

**Please Note: Additional Potential Water Shutoff  
August 23 Through 24, 2022  
7:00 PM to 5:00 AM**

GVC Construction Inc. is working along Lowell Street as part of the Phase 2A Water Main Replacement Project that will require the water to be shutoff for approximately 10 hours to your home. Due to the proximity of your household to the planned work, your house will be without water for the entire shutoff period as noted above. Please note: The Lexington Select Board approved a Special Permit under the Noise Bylaw to allow for the 24" water main installation work at the Lowell Street/Woburn Street intersection to be performed as night work during the weeks of August 22, 2022 and August 29, 2022, four nights per week, from 7pm to 5am. The water shutoff is scheduled to occur during these nighttime work hours on the evenings of August 22 and possibly August 23 as noted in the header above.

Prior to the shutdown, we recommend filling your bathtub with water. This water can be used to flush toilets until the shutdown is complete. We also recommend you fill up some containers for drinking water, as well as some pots for cooking.

When the water is turned back on you may experience some discoloration of your water. If so, run the water for a short period time until the discoloration subsides.

For residents that have registered for CodeRED alerts or with a listed phone number and address within the impacted areas of a water shutdown, notifications will also be communicated through Lexington's CodeRED system for extended water shutdowns. For residents interested in registering for CodeRED please find information at the following link: <https://www.lexingtonma.gov/395/CodeRED-Emergency-Notification-System>

We will do everything we can to expedite this work and apologize in advance for any inconvenience this may cause. Should you have any questions or need additional information please contact Mike Micalizzi of Wright-Pierce at 978-409-8986.
