

Commonwealth of Massachusetts  
**DEPARTMENT OF HOUSING &  
COMMUNITY DEVELOPMENT**

Charles D. Baker, Governor ♦ Karyn E. Polito, Lt. Governor ♦ Jennifer D. Maddox, Undersecretary

Issue Date: August 10, 2022

Revised: October 21, 2022

**Compliance Guidelines for Multi-family Zoning Districts**  
**Under Section 3A of the Zoning Act**

**1. Overview of Section 3A of the Zoning Act**

Section 3A of the Zoning Act provides: *An MBTA community shall have a zoning ordinance or by-law that provides for at least 1 district of reasonable size in which multi-family housing is permitted as of right; provided, however, that such multi-family housing shall be without age restrictions and shall be suitable for families with children. For the purposes of this section, a district of reasonable size shall: (i) have a minimum gross density of 15 units per acre, subject to any further limitations imposed by section 40 of chapter 131 and title 5 of the state environmental code established pursuant to section 13 of chapter 21A; and (ii) be located not more than 0.5 miles from a commuter rail station, subway station, ferry terminal or bus station, if applicable.*

The purpose of Section 3A is to encourage the production of multi-family housing by requiring MBTA communities to adopt zoning districts where multi-family housing is allowed as of right, and that meet other requirements set forth in the statute.

The Department of Housing and Community Development, in consultation with the Massachusetts Bay Transportation Authority and the Massachusetts Department of Transportation, is required to promulgate guidelines to determine if an MBTA community is in compliance with Section 3A. DHCD promulgated preliminary guidance on January 29, 2021. DHCD updated that preliminary guidance on December 15, 2021, and on that same date issued draft guidelines for public comment. These final guidelines supersede all prior guidance and set forth how MBTA communities may achieve compliance with Section 3A.

**2. Definitions**

“Adjacent community” means an MBTA community that (i) has within its boundaries less than 100 acres of developable station area, and (ii) is not an adjacent small town.

“Adjacent small town” means an MBTA community that (i) has within its boundaries less than 100 acres of developable station area, and (ii) either has a population density of less than 500 persons per square mile, or a population of not more than 7,000 year-round residents as determined in the most recently published United States Decennial Census of Population and Housing.

“Affordable unit” means a multi-family housing unit that is subject to a restriction in its chain of title limiting the sale price or rent, or limiting occupancy to an individual or household of a specified income, or both. Affordable units may be, but are not required to be, eligible for inclusion on DHCD’s Subsidized Housing Inventory. Nothing in these Guidelines changes the Subsidized Housing Inventory eligibility criteria, and no affordable unit shall be counted on the Subsidized Housing Inventory unless it satisfies the requirements for inclusion under 760 CMR 56.03(2) or any other regulation or guidance issued by DHCD.

“Age-restricted housing” means any housing unit encumbered by a title restriction requiring a minimum age for some or all occupants.

“As of right” means development that may proceed under a zoning ordinance or by-law without the need for a special permit, variance, zoning amendment, waiver, or other discretionary zoning approval.

“Bus station” means a location with a passenger platform and other fixed infrastructure serving as a point of embarkation for the MBTA Silver Line. Upon the request of an MBTA community, DHCD, in consultation with the MBTA, may determine that other locations qualify as a bus station if (i) such location has a sheltered platform or other fixed infrastructure serving a point of embarkation for a high-capacity MBTA bus line, and (ii) the area around such fixed infrastructure is highly suitable for multi-family housing.

“Commuter rail community” means an MBTA community that (i) does not meet the criteria for a rapid transit community, and (ii) has within its borders at least 100 acres of developable station area associated with one or more commuter rail stations.

“Commuter rail station” means any MBTA commuter rail station with year-round, rather than intermittent, seasonal, or event-based, service, including stations under construction and scheduled to being service before the end of 2023, but not including existing stations at which service will be terminated, or reduced below regular year-round service, before the end of 2023.

“Compliance model” means the model created by DHCD to determine compliance with Section 3A’s reasonable size, gross density, and location requirements. The compliance model is described in further detail in Appendix 2.

“Determination of compliance” means a determination made by DHCD as to whether an MBTA community has a multi-family zoning district that complies with the requirements of Section 3A. A determination of compliance may be determination of interim compliance or a determination of district compliance, as described in section 9.

“Developable land” means land on which multi-family housing can be permitted and constructed. For purposes of these guidelines, developable land consists of: (i) all privately-owned land except lots or portions of lots that meet the definition of excluded land, and (ii) developable public land.

“Developable public land” means any publicly-owned land that (i) is used by a local housing authority; (ii) has been identified as a site for housing development in a housing production plan approved by DHCD; or (iii) has been designated by the public owner for disposition and

redevelopment. Other publicly-owned land may qualify as developable public land if DHCD determines, at the request of an MBTA community and after consultation with the public owner, that such land is the location of obsolete structures or uses, or otherwise is suitable for conversion to multi-family housing, and will be converted to or made available for multi-family housing within a reasonable period of time.

“Developable station area” means developable land that is within 0.5 miles of a transit station.

“DHCD” means the Department of Housing and Community Development.

“EOHED” means the Executive Office of Housing and Economic Development.

“Excluded land” means land areas on which it is not possible or practical to construct multi-family housing. For purposes of these guidelines, excluded land is defined by reference to the ownership, use codes, use restrictions, and hydrological characteristics in MassGIS and consists of the following:

- (i) All publicly-owned land, except for lots or portions of lots determined to be developable public land.
- (ii) All rivers, streams, lakes, ponds and other surface waterbodies.
- (iii) All wetland resource areas, together with a buffer zone around wetlands and waterbodies equivalent to the minimum setback required by title 5 of the state environmental code.
- (iv) Protected open space and recreational land that is legally protected in perpetuity (for example, land owned by a local land trust or subject to a conservation restriction), or that is likely to remain undeveloped due to functional or traditional use (for example, cemeteries).
- (v) All public rights-of-way and private rights-of-way.
- (vi) Privately-owned land on which development is prohibited to protect private or public water supplies, including, but not limited to, Zone I wellhead protection areas and Zone A surface water supply protection areas.
- (vii) Privately-owned land used for educational or institutional uses such as a hospital, prison, electric, water, wastewater or other utility, museum, or private school, college or university.

“Ferry terminal” means the location where passengers embark and disembark from regular, year-round MBTA ferry service.

“Gross density” means a units-per-acre density measurement that includes land occupied by public rights-of-way and any recreational, civic, commercial, and other nonresidential uses.

“Housing suitable for families” means housing comprised of residential dwelling units that are not age-restricted housing, and for which there are no zoning restriction on the number of bedrooms, the size of bedrooms, or the number of occupants.

“Listed funding sources” means (i) the Housing Choice Initiative as described by the governor in a message to the general court dated December 11, 2017; (ii) the Local Capital Projects Fund established in section 2EEEE of chapter 29; and (iii) the MassWorks infrastructure program established in section 63 of chapter 23A.

“Lot” means an area of land with definite boundaries that is used or available for use as the site of a building or buildings.

“MassGIS data” means the comprehensive, statewide database of geospatial information and mapping functions maintained by the Commonwealth's Bureau of Geographic Information, within the Executive Office of Technology Services and Security, including the lot boundaries and use codes provided by municipalities.

“MBTA” means the Massachusetts Bay Transportation Authority.

“MBTA community” means a city or town that is: (i) one of the 51 cities and towns as defined in section 1 of chapter 161A; (ii) one of the 14 cities and towns as defined in said section 1 of said chapter 161A; (iii) other served communities as defined in said section 1 of said chapter 161A; or (iv) a municipality that has been added to the Massachusetts Bay Transportation Authority under section 6 of chapter 161A or in accordance with any special law relative to the area constituting the authority.

“Multi-family housing” means a building with 3 or more residential dwelling units or 2 or more buildings on the same lot with more than 1 residential dwelling unit in each building.

“Multi-family unit capacity” means an estimate of the total number of multi-family housing units that can be developed as of right within a multi-family zoning district, made in accordance with the requirements of section 5.b below.

“Multi-family zoning district” means a zoning district, including a base district or an overlay district, in which multi-family housing is allowed as of right; provided that the district shall be in a fixed location or locations, and shown on a map that is part of the zoning ordinance or by-law.

“One Stop Application” means the single application portal for the Community One Stop for Growth through which (i) the Executive Office of Housing and Economic Development considers requests for funding from the MassWorks infrastructure program; (ii) DHCD considers requests for funding from the Housing Choice Initiative, (iii) EOHEd, DHCD and other state agencies consider requests for funding from other discretionary grant programs.

“Private rights-of-way” means land area within which private streets, roads and other ways have been laid out and maintained, to the extent such land areas can be reasonably identified by examination of available tax parcel data.

“Publicly-owned land” means (i) any land owned by the United States or a federal agency or authority; (ii) any land owned by the Commonwealth of Massachusetts or a state agency or authority; and (iii) any land owned by a municipality or municipal board or authority.

“Public rights-of-way” means land area within which public streets, roads and other ways have been laid out and maintained, to the extent such land areas can be reasonably identified by examination of available tax parcel data.

“Rapid transit community” means an MBTA community that has within its borders at least 100 acres of developable station area associated with one or more subway stations, or MBTA Silver Line bus rapid transit stations.

“Residential dwelling unit” means a single unit providing complete, independent living facilities for one or more persons, including permanent provisions for living, sleeping, eating, cooking and sanitation.

“Section 3A” means section 3A of the Zoning Act.

“Sensitive land” means developable land that, due to its soils, slope, hydrology, or other physical characteristics, has significant conservation values that could be impaired, or vulnerabilities that could be exacerbated, by the development of multi-family housing. It also includes locations where multi-family housing would be at increased risk of damage caused by flooding. Sensitive land includes, but is not limited to, wetland buffer zones extending beyond the title 5 setback area; land subject to flooding that is not a wetland resource area; priority habitat for rare or threatened species; DEP-approved wellhead protection areas in which development may be restricted, but is not prohibited (Zone II and interim wellhead protection areas); and land areas with prime agricultural soils that are in active agricultural use.

“Site plan review” means a process established by local ordinance or by-law by which a local board reviews, and potentially imposes conditions on, the appearance and layout of a specific project prior to the issuance of a building permit.

“Subway station” means any of the stops along the MBTA Red Line, Green Line, Orange Line, or Blue Line, including any extensions to such lines now under construction and scheduled to begin service before the end of 2023.

“Transit station” means an MBTA subway station, commuter rail station, ferry terminal or bus station.

“Transit station area” means the land area within 0.5 miles of a transit station.

“Zoning Act” means chapter 40A of the Massachusetts General Laws.

### **3. General Principles of Compliance**

These compliance guidelines describe how an MBTA community can comply with the requirements of Section 3A. The guidelines specifically address:

- What it means to allow multi-family housing “as of right.”
- The metrics that determine if a multi-family zoning district is “of reasonable size.”

- How to determine if a multi-family zoning district has a minimum gross density of 15 units per acre, subject to any further limitations imposed by section 40 of chapter 131 and title 5 of the state environmental code.
- The meaning of Section 3A’s mandate that “such multi-family housing shall be without age restrictions and shall be suitable for families with children.”
- The extent to which MBTA communities have flexibility to choose the location of a multi-family zoning district.

The following general principles have informed the more specific compliance criteria that follow:

- MBTA communities with subway stations, commuter rail stations and other transit stations benefit from having these assets located within their boundaries and should provide opportunity for multi-family housing development around these assets. MBTA communities with no transit stations within their boundaries benefit from proximity to transit stations in nearby communities.
- The multi-family zoning districts required by Section 3A should encourage the development of multi-family housing projects of a scale, density and aesthetic that are compatible with existing surrounding uses, and minimize impacts to sensitive land.
- “Reasonable size” is a relative rather than an absolute determination. Because of the diversity of MBTA communities, a multi-family zoning district that is “reasonable” in one city or town may not be reasonable in another city or town.
- When possible, multi-family zoning districts should be in areas that have safe, accessible, and convenient access to transit stations for pedestrians and bicyclists.

#### **4. Allowing Multi-Family Housing “As of Right”**

To comply with Section 3A, a multi-family zoning district must allow multi-family housing “as of right,” meaning that the construction and occupancy of multi-family housing is allowed in that district without the need for a special permit, variance, zoning amendment, waiver, or other discretionary approval. DHCD will determine whether zoning provisions allow for multi-family housing as of right consistent with the following guidelines.

##### *a. Site plan review*

The Zoning Act does not establish nor recognize site plan review as an independent method of regulating land use. However, the Massachusetts courts have recognized site plan review as a permissible regulatory tool, including for uses that are permitted as of right. The court decisions establish that when site plan review is required for a use permitted as of right, site plan review involves the regulation of a use and not its outright prohibition. The scope of review is therefore limited to imposing reasonable terms and conditions on the proposed use, consistent with applicable

case law.<sup>1</sup> These guidelines similarly recognize that site plan review may be required for multi-family housing projects that are allowed as of right, within the parameters established by the applicable case law. Site plan approval may regulate matters such as vehicular access and circulation on a site, architectural design of a building, and screening of adjacent properties. Site plan review should not unreasonably delay a project nor impose conditions that make it infeasible or impractical to proceed with a project that is allowed as of right and complies with applicable dimensional regulations.

*b. Affordability requirements*

Section 3A does not include any express requirement or authorization for an MBTA community to require affordable units in a multi-family housing project that is allowed as of right. It is a common practice in many cities and towns to require affordable units in a multi-family project that requires a special permit, or as a condition for building at greater densities than the zoning otherwise would allow. These inclusionary zoning requirements serve the policy goal of increasing affordable housing production. If affordability requirements are excessive, however, they can make it economically infeasible to construct new multi-family housing.

For purposes of making compliance determinations with Section 3A, DHCD will consider an affordability requirement to be consistent with as of right zoning as long as the zoning requires not more than 10 percent of the units in a project to be affordable units, and the cap on the income of families or individuals who are eligible to occupy the affordable units is not less than 80 percent of area median income. Notwithstanding the foregoing, DHCD may, in its discretion, approve a greater percentage of affordable units, or deeper affordability for some or all of the affordable units, in either of the following circumstances:

- (i) The affordability requirements applicable in the multi-family zoning district are reviewed and approved by DHCD as part of a smart growth district under chapter 40R, or under another zoning incentive program administered by DHCD; or
- (ii) The affordability requirements applicable in the multi-family zoning district are supported by an economic feasibility analysis, prepared for the municipality by a qualified and independent third party acceptable to DHCD, and using a methodology and format acceptable to DHCD. The analysis must demonstrate that a reasonable variety of multi-family housing types can be feasibly developed at the proposed affordability levels, taking into account the densities allowed as of right in the district, the dimensional requirements applicable within the district, and the minimum number of parking spaces required.

In no case will DHCD approve alternative affordability requirements that require more than 20 percent of the units in a project to be affordable units, except in a smart growth zoning district under chapter 40R with a 25 percent affordability requirement approved and adopted prior to the

---

<sup>1</sup> See, e.g., *Y.D. Dugout, Inc. v. Board of Appeals of Canton*, 357 Mass. 25 (1970); *Prudential Insurance Co. of America v. Board of Appeals of Westwood*, 23 Mass. App. Ct. 278 (1986); *Osberg v. Planning Bd. of Sturbridge*, 44 Mass. App. Ct. 56, 59 (1997) (Planning Board “may impose reasonable terms and conditions on the proposed use, but it does not have discretionary power to deny the use”).

issuance of these guidelines, including any such existing district that is expanded or amended to comply with these guidelines.

c. *Other requirements that do not apply uniformly in the multi-family zoning district*

Zoning will not be deemed compliant with Section 3A’s requirement that multi-family housing be allowed as of right if the zoning imposes requirements on multi-family housing that are not generally applicable to other uses. The following are examples of requirements that would be deemed to be inconsistent with “as of right” use: (i) a requirement that multi-family housing meet higher energy efficiency standards than other uses; (ii) a requirement that a multi-family use achieve a third party certification that is not required for other uses in the district; and (iii) a requirement that multi-family use must be combined with commercial or other uses on the same lot or as part of a single project. Mixed use projects may be allowed as of right in a multi-family zoning district, as long as multi-family housing is separately allowed as of right.

**5. Determining “Reasonable Size”**

In making determinations of “reasonable size,” DHCD will take into consideration both the land area of the multi-family zoning district, and the multi-family zoning district’s multi-family unit capacity.

a. *Minimum land area*

A zoning district is a specifically delineated land area with uniform regulations and requirements governing the use of land and the placement, spacing, and size of buildings. For purposes of compliance with Section 3A, a multi-family zoning district should be a neighborhood-scale district, not a single development site on which the municipality is willing to permit a particular multi-family project. DHCD will certify compliance with Section 3A only if an MBTA community’s multi-family zoning district meets the minimum land area applicable to that MBTA community, if any, as set forth in Appendix 1. The minimum land area for each MBTA community has been determined as follows:

- (i) In rapid transit communities, commuter rail communities, and adjacent communities, the minimum land area of the multi-family zoning district is 50 acres, or 1.5% of the developable land in an MBTA community, whichever is *less*. In certain cases, noted in Appendix 1, a smaller minimum land area applies.
- (ii) In adjacent small towns, there is no minimum land area. In these communities, the multi-family zoning district may comprise as many or as few acres as the community determines is appropriate, as long as the district meets the applicable minimum multi-family unit capacity and the minimum gross density requirements.

In all cases, at least half of the multi-family zoning district land areas must comprise contiguous lots of land. No portion of the district that is less than 5 contiguous acres land will count toward the minimum size requirement. If the multi-family unit capacity and gross density requirements can be achieved in a district of fewer than 5 acres, then the district must consist entirely of contiguous lots.

b. *Minimum multi-family unit capacity*

A reasonably sized multi-family zoning district must also be able to accommodate a reasonable number of multi-family housing units as of right. For purposes of determinations of compliance with Section 3A, DHCD will consider a reasonable multi-family unit capacity for each MBTA community to be a specified percentage of the total number of housing units within the community, with the applicable percentage based on the type of transit service in the community, as shown on Table 1:

Table 1.

<b>Category</b>	<b>Percentage of total housing units</b>
Rapid transit community	25%
Commuter rail community	15%
Adjacent community	10%
Adjacent small town	5%

To be deemed in compliance with Section 3A, each MBTA community must have a multi-family zoning district with a multi-family unit capacity equal to or greater than the minimum unit capacity shown for it in Appendix 1. The minimum multi-family unit capacity for each MBTA community has been determined as follows:

- (i) First, by multiplying the number of housing units in that community by 0.25, 0.15, 0.10, or .05 depending on the MBTA community category. For example, a rapid transit community with 7,500 housing units is required to have a multi-family zoning district with a multi-family unit capacity of  $7,500 \times 0.25 = 1,875$  multi-family units. For purposes of these guidelines, the number of total housing units in each MBTA community has been established by reference to the most recently published United States Decennial Census of Population and Housing.
- (ii) Second, when there is a minimum land area applicable to an MBTA community, by multiplying that minimum land area (up to 50 acres) by Section 3A's minimum gross density requirement of 15 units per acre. The product of that multiplication creates a floor on multi-family unit capacity. For example, an MBTA community with a minimum land area of 40 acres must have a district with a multi-family unit capacity of at least 600 (40 x 15) units.
- (iii) The minimum unit capacity applicable to each MBTA community is *the greater of* the numbers resulting from steps (i) and (ii) above, but subject to the following limitation: In no case does the minimum multi-family unit capacity exceed 25% of the total housing units in that MBTA community.

*Example: The minimum multi-family unit capacity for an adjacent community with 1,000 housing units and a minimum land area of 50 acres is determined as follows:(i) first, by multiplying  $1,000 \times .1 = 100$  units; (ii) second, by multiplying  $50 \times 15 = 750$  units;(iii) by taking the larger number, but adjusting that number down, if necessary, so that unit capacity is no more than 25% of  $1,000 = 250$  units. In this case, the adjustment in step (iii) results in a minimum unit capacity of 250 units.*

c. *Methodology for determining a multi-family zoning district's multi-family unit capacity*

MBTA communities seeking a determination of compliance must use the DHCD compliance model to provide an estimate of the number of multi-family housing units that can be developed as of right within the multi-family zoning district. The multi-family unit capacity of an existing or proposed district shall be calculated using the unit capacity worksheet described in Appendix 2. This worksheet produces an estimate of a district's multi-family unit capacity using inputs such as the amount of developable land in the district, the dimensional requirements applicable to lots and buildings (including, for example, height limitations, lot coverage limitations, and maximum floor area ratio), and the parking space requirements applicable to multi-family uses.

Minimum unit capacity is a measure of whether a multi-family zoning district is of a reasonable size, not a requirement to produce housing units. Nothing in Section 3A or these guidelines should be interpreted as a mandate to construct a specified number of housing units, nor as a housing production target. Demonstrating compliance with the minimum multi-family unit capacity requires only that an MBTA community show that the zoning allows multi-family housing as of right and that a sufficient number of multi-family housing units could be added to or replace existing uses and structures over time—even though such additions or replacements may be unlikely to occur soon.

If an MBTA community has two or more zoning districts in which multi-family housing is allowed as of right, then two or more districts may be considered cumulatively to meet the minimum land area and minimum multi-family unit capacity requirements, as long as each district independently complies with Section 3A's other requirements.

d. *Water and wastewater infrastructure within the multi-family zoning district*

MBTA communities are encouraged to consider the availability of water and wastewater infrastructure when selecting the location of a new multi-family zoning district. But compliance with Section 3A does not require a municipality to install new water or wastewater infrastructure, or add to the capacity of existing infrastructure, to accommodate future multi-family housing production within the multi-family zoning district. In most cases, multi-family housing can be created using private septic and wastewater treatment systems that meet state environmental standards. Where public systems currently exist, but capacity is limited, private developers may be able to support the cost of necessary water and sewer extensions. While the zoning must allow for gross average density of at least 15 units per acre, there may be other legal or practical limitations, including lack of infrastructure or infrastructure capacity, that result in actual housing production at lower density than the zoning allows.

The multi-family unit capacity analysis does not need to take into consideration limitations on development resulting from existing water or wastewater infrastructure within the multi-family zoning district, or, in areas not served by public sewer, any applicable limitations under title 5 of the state environmental code. For purposes of the unit capacity analysis, it is assumed that housing developers will design projects that work within existing water and wastewater constraints, and that developers, the municipality, or the Commonwealth will provide funding for infrastructure upgrades as needed for individual projects.

## 6. Minimum Gross Density

Section 3A expressly requires that a multi-family zoning district—not just the individual lots of land within the district—must have a minimum gross density of 15 units per acre, subject to any further limitations imposed by section 40 of chapter 131 and title 5 of the state environmental code established pursuant to section 13 of chapter 21A. The Zoning Act defines “gross density” as “a units-per-acre density measurement that includes land occupied by public rights-of-way and any recreational, civic, commercial and other nonresidential uses.”

### a. *District-wide gross density*

To meet the district-wide gross density requirement, the dimensional restrictions and parking requirements for the multi-family zoning district must allow for a gross density of 15 units per acre of land within the district. By way of example, to meet that requirement for a 40-acre multi-family zoning district, the zoning must allow for at least 15 multi-family units per acre, or a total of at least 600 multi-family units.

For purposes of determining compliance with Section 3A’s gross density requirement, the DHCD compliance model will not count in the denominator any excluded land located within the multi-family zoning district, except public rights-of-way, private rights-of-way, and publicly-owned land used for recreational, civic, commercial, and other nonresidential uses. This method of calculating minimum gross density respects the Zoning Act’s definition of gross density—“a units-per-acre density measurement that includes land occupied by public rights-of-way and any recreational, civic, commercial and other nonresidential uses”—while making it unnecessary to draw patchwork multi-family zoning districts that carve out wetlands and other types of excluded land that are not developed or developable.

### b. *Achieving district-wide gross density by sub-districts*

Zoning ordinances and by-laws typically limit the unit density on individual lots. To comply with Section 3A’s gross density requirement, an MBTA community may establish reasonable sub-districts within a multi-family zoning district, with different density limits for each sub-district, provided that the gross density for the district as a whole meets the statutory requirement of not less than 15 multi-family units per acre. DHCD will review sub-districts to ensure that the density allowed as of right in each sub-district is reasonable and not intended to frustrate the purpose of Section 3A by allowing projects of a such high density that they are not likely to be constructed.

### c. *Wetland and septic considerations relating to density*

Section 3A provides that a district of reasonable size shall have a minimum gross density of 15 units per acre, “subject to any further limitations imposed by section 40 of chapter 131 and title 5 of the state environmental code established pursuant to section 13 of chapter 21A.” This directive means that even though the zoning district must permit 15 units per acre as of right, any multi-family housing produced within the district is subject to, and must comply with, the state wetlands protection act and title 5 of the state environmental code—even if such compliance means a proposed project will be less dense than 15 units per acre.

**7. Determining Suitability for Families with Children**

Section 3A states that a compliant multi-family zoning district must allow multi-family housing as of right, and that “such multi-family housing shall be without age restrictions and shall be suitable for families with children.” DHCD will deem a multi-family zoning district to comply with these requirements as long as the zoning does not require multi-family uses to include units with age restrictions, and does not limit or restrict the size of the units, cap the number of bedrooms, the size of bedrooms, or the number of occupants, or impose a minimum age of occupants. Limits, if any, on the size of units or number of bedrooms established by state law or regulation are not relevant to Section 3A or to determinations of compliance made pursuant to these guidelines.

**8. Location of Districts**

*a. General rule for determining the applicability of Section 3A’s location requirement*

Section 3A states that a compliant multi-family zoning district shall “be located not more than 0.5 miles from a commuter rail station, subway station, ferry terminal or bus station, if applicable.” When an MBTA community has only a small amount of transit station area within its boundaries, it may not be possible or practical to locate all of the multi-family zoning district within 0.5 miles of a transit station. Transit station area may not be a practical location for a multi-family zoning district if it does not include developable land where multi-family housing can actually be constructed. Therefore, for purposes of determining compliance with Section 3A, DHCD will consider the statute’s location requirement to be “applicable” to a particular MBTA community only if that community has within its borders at least 100 acres of developable station area. DHCD will require more or less of the multi-family zoning district to be located within transit station areas depending on how much total developable station area is in that community, as shown on Table 2:

Table 2.

<b><u>Total developable station area within the MBTA community (acres)</u></b>	<b><u>Portion of the multi-family zoning district that must be within a transit station area</u></b>
0-100	0%
101-250	20%
251-400	40%
401-600	50%
601-800	75%
801+	90%

The percentages specified in this table apply to both the minimum land area and the minimum multi-family unit capacity. For example, in an MBTA community that has a total of 500 acres of transit station area within its boundaries, a multi-family zoning district will comply with Section 3A’s location requirement if at least 50 percent of the district’s minimum land area is located within the transit station area, *and* at least 50 percent of the district’s minimum multi-family unit capacity is located within the transit station area.

A community with transit station areas associated with more than one transit station may locate the multi-family zoning district in any of the transit station areas. For example, a rapid transit community with transit station area around a subway station in one part of town, and transit station area around a commuter rail station in another part of town, may locate its multi-family zoning district in either or both transit station areas.

*b. MBTA communities with limited or no transit station area*

When an MBTA community has less than 100 acres of developable station area within its boundaries, the MBTA community may locate the multi-family zoning district anywhere within its boundaries. To encourage transit-oriented multi-family housing consistent with the general intent of Section 3A, MBTA communities are encouraged to consider locating the multi-family zoning district in an area with reasonable access to a transit station based on existing street patterns, pedestrian connections, and bicycle lanes, or in an area that qualifies as an “eligible location” as defined in Chapter 40A—for example, near an existing downtown or village center, near a regional transit authority bus stop or line, or in a location with existing under-utilized facilities that can be redeveloped into new multi-family housing.

*c. General guidance on district location applicable to all MBTA communities*

When choosing the location of a new multi-family zoning district, every MBTA community should consider how much of a proposed district is sensitive land on which permitting requirements and other considerations could make it challenging or inadvisable to construct multi-family housing. For example, an MBTA community may want to avoid including in a multi-family zoning district areas that are subject to flooding, or are known habitat for rare or threatened species, or have prime agricultural soils in active agricultural use.

## **9. Determinations of Compliance**

Section 3A provides that any MBTA community that fails to comply with Section 3A’s requirements will be ineligible for funding from any of the listed funding sources. DHCD will make determinations of compliance with Section 3A in accordance with these guidelines to inform state agency decisions on which MBTA communities are eligible to receive funding from the listed funding sources. Determinations of compliance also may inform funding decisions by EOHED, DHCD, the MBTA and other state agencies which consider local housing policies when evaluating applications for discretionary grant programs, or making other discretionary funding decisions.

DHCD interprets Section 3A as allowing every MBTA community a reasonable opportunity to enact zoning amendments as needed to come into compliance. Accordingly, DHCD will recognize both *interim* compliance, which means an MBTA community is taking active steps to enact a multi-family zoning district that complies with Section 3A, and *district* compliance, which is achieved when DHCD determines that an MBTA community has a multi-family zoning district that complies with Section 3A. The requirements for interim and district compliance are described in more detail below.

Table 3.

<b>Transit Category (# of municipalities)</b>	<b>Deadline to Submit Action Plan</b>	<b>Deadline to Submit District Compliance Application</b>
Rapid transit community (12)	January 31, 2023	December 31, 2023
Commuter rail community (71)	January 31, 2023	December 31, 2024
Adjacent community (58)	January 31, 2023	December 31, 2024
Adjacent small town (34)	January 31, 2023	December 31, 2025

*a. Process to achieve interim compliance*

Many MBTA communities do not currently have a multi-family zoning district of reasonable size that complies with the requirements of Section 3A. Prior to achieving district compliance (but no later than the deadlines set forth in Table 3), these MBTA communities can achieve interim compliance by taking the following affirmative steps towards the creation of a compliant multi-family zoning district.

- i. *Creation and submission of an action plan.* An MBTA community seeking to achieve interim compliance must first submit an action plan on a form to be provided by DHCD. An MBTA community action plan must provide information about current zoning, past planning for multi-family housing, if any, and potential locations for a multi-family zoning district. The action plan also will require the MBTA community to establish a timeline for various actions needed to create a compliant multi-family zoning district.
- ii. *DHCD approval of an action plan.* DHCD will review each submitted action plan for consistency with these guidelines, including but not limited to the timelines in Table 3. If DHCD determines that the MBTA community’s action plan is reasonable and will lead to district compliance in a timely manner, DHCD will issue a determination of interim compliance. DHCD may require modifications to a proposed action plan prior to approval.
- iii. *Implementation of the action plan.* After DHCD approves an action plan and issues a determination of interim compliance, an MBTA community must diligently implement the action plan. DHCD may revoke a determination of interim compliance if an MBTA community has not made sufficient progress in implementing an approved action plan. DHCD and EOHED will review an MBTA community’s progress in implementing its action plan prior to making an award of funds under the Housing Choice Initiative and Massworks infrastructure program.
- iv. *Deadlines for submitting action plans.* To achieve interim compliance for grants made through the 2023 One Stop Application, action plans must be submitted by no later than January 31, 2023. An MBTA community that does not submit an action plan by that date may not receive a DHCD determination of interim compliance in time to receive an award of funds from the listed funding sources in 2023. An MBTA community that does not achieve interim compliance in time for the 2023 One Stop Application may submit an action plan to become eligible for a subsequent round of the One Stop Application, provided that an action plan must be submitted

by no later than January 31 of the year in which the MBTA community seeks to establish grant eligibility; and provided further that no action plan may be submitted or approved after the applicable district compliance application deadline set forth in Table 3.

b. *Assistance for communities implementing an action plan.*

MBTA communities are encouraged to communicate as needed with DHCD staff throughout the process of implementing an action plan. DHCD will endeavor to respond to inquiries about whether a proposed multi-family zoning district complies with Section 3A prior to a vote by the municipal legislative body to create or modify such a district. Such requests shall be made on a form to be provided by DHCD and should be submitted at least 90 days prior to the vote of the legislative body.

c. *Requests for determination of district compliance*

When an MBTA community believes it has a multi-family zoning district that complies with Section 3A, it may request a determination of district compliance from DHCD. Such a request may be made for a multi-family zoning district that was in existence on the date that Section 3A became law, or for a multi-family zoning district that was created or amended after the enactment of Section 3A. In either case, such request shall be made on an application form required by DHCD and shall include, at a minimum, the following information. Municipalities will need to submit:

- (i) A certified copy of the municipal zoning ordinance or by-law and zoning map, including all provisions that relate to uses and structures in the multi-family zoning district.
- (ii) An estimate of multi-family unit capacity using the compliance model.
- (iii) GIS shapefile for the multi-family zoning district.
- (iv) In the case of a by-law enacted by a town, evidence that the clerk has submitted a copy of the adopted multi-family zoning district to the office of the Attorney General for approval as required by state law, or evidence of the Attorney General's approval.

After receipt of a request for determination of district compliance, DHCD will notify the requesting MBTA community within 30 days if additional information is required to process the request. Upon reviewing a complete application, DHCD will provide the MBTA community a written determination either stating that the existing multi-family zoning district complies with Section 3A, or identifying the reasons why the multi-family zoning district fails to comply with Section 3A and the steps that must be taken to achieve compliance. An MBTA community that has achieved interim compliance prior to requesting a determination of district compliance shall remain in interim compliance for the period during which a request for determination of district compliance, with all required information, is pending at DHCD.

**10. Ongoing Obligations; Rescission of a Determination of Compliance**

After receiving a determination of compliance, an MBTA community must notify DHCD in writing of any zoning amendment or proposed zoning amendment that affects the compliant multi-family zoning district, or any other by-law, ordinance, rule or regulation that limits the development

of multi-family housing in the multi-family zoning district. DHCD may rescind a determination of district compliance, or require changes to a multi-family zoning district to remain in compliance, if DHCD determines that:

- (i) The MBTA community submitted inaccurate information in its application for a determination of compliance;
- (ii) The MBTA community failed to notify DHCD of a zoning amendment that affects the multi-family zoning district;
- (iii) The MBTA community enacts or amends any by-law or ordinance, or other rule or regulation, that materially alters the minimum land area and/or the multi-family unit capacity in the multi-family zoning district;
- (iv) A board, authority or official in the MBTA community does not issue permits, or otherwise acts or fails to act, to allow construction of a multi-family housing project that is allowed as of right in the multi-family zoning district;
- (v) The MBTA community takes other action that causes the multi-family zoning district to no longer comply with Section 3A; or
- (vi) An MBTA community with an approved multi-family zoning district has changed transit category as a result of a newly opened or decommissioned transit station, or the establishment of permanent, regular service at a transit station where there was formerly intermittent or event-based service.

## **11. Changes to MBTA Service**

Section 3A applies to the 175 MBTA communities identified in section 1A of the Zoning Act and section 1 of chapter 161A of the General Laws. When MBTA service changes, the list of MBTA communities and/or the transit category assignments of those MBTA communities in Appendix 1 may change as well.

The transit category assignments identified in Appendix 1 of these guidelines reflect certain MBTA service changes that will result from new infrastructure now under construction in connection with the South Coast Rail and Green Line Extension projects. These service changes include the opening of new Green Line stations and commuter rail stations, as well as the elimination of regular commuter rail service at the Lakeville station. These changes are scheduled to take effect in all cases a year or more before any municipal district compliance deadline. Affected MBTA communities are noted in Appendix 1.

Municipalities that are not now identified as MBTA communities and may be identified as such in the future are not addressed in these guidelines or included in Appendix 1. New MBTA communities will be addressed with revisions to Appendix 1, and separate compliance timelines, in the future.

Future changes to Silver Line routes or stations may change district location requirements when expanded high-capacity service combined with new facilities creates a bus station where there was not one before. Changes to other bus routes, including the addition or elimination of bus stops or reductions or expansions of bus service levels, do not affect the transit categories assigned to MBTA communities and will not affect location requirements for multi-family zoning districts. Any future changes to MBTA transit service, transit routes and transit service levels are determined by the MBTA Board of Directors consistent with the MBTA's Service Delivery Policy.
